C. MY PROJECT PROPOSAL DETAILS

Project Identifier/Number

Proposal Title Organization of production of vitamin-rich garlic onion paste

Project Deadline 1 year

Brief Abstract of the Project proposal

In the Bulgbashi District of Andijan region specified in the resolution of the president of the Republic of Uzbekistan dated October 15, 2020 PP-4863, a total area of 400 hectares is intended for the cultivation of garlic products. the amount of allisin in the product is greater. It gives more benefits to health. Garlic onion paste has an effective effect against candidiasis, which is encountered in women.

Thanks to the production of vitamin-rich garlic onion paste, axoli's health, the convenience of storing it due to the available exteriors are distinguished by the fact that it meets all the requirements of hygienic nutrition, passed laboratory tests, natural products.

Garlic as the main raw material in Andijan is grown every year more than 44 thousand tons, 20% is extracted from the landfill due to technical damage when frying, that is, it develops well, ie by a product area of more than 8 thousand tons. As a result of the launch of the project, garlic turns out to be a ready-made paste by processing onion waste.
